

project & sourcing office

Stephanie Karg

Vita

After studying business administration and the languages English and Spanish in Giessen, Germany and Stirling, Scotland, I have gained more than 15 years of professional and management experience in sourcing, procurement and project management.

As strategic sourcing manager and project manager I operate in industrial, trading as well as in service companies in various industries, amongst others in optics, textile and leather, finance, construction materials and solar, biotechnology, print and media. Thus I have become acquainted with the full scope of international purchasing activities and areas: raw materials and traded goods, subcontracting and outsourcing, services and investments.

A post-graduate course of studies in international project management at the renowned University of California Berkeley/USA with the PMP® certification (Project Management Professional) complements my practical experience in leading interdisciplinary initiatives in product management, supplier development and crisis management.
